

## Working **with** you!

Work Rehab works with insurers, government agencies and departments, employers and legal firms to deliver best-practice occupational rehabilitation services.

Our dynamic team of health professionals work together to achieve positive outcomes for your Company and your Injured Worker. We do this through personalised, pro-active case management and specialised rehabilitation services.

Your cases will be managed within one of our four priority teams – Life Insurance, Military, WorkCover, and the CTP team – to deliver targeted and focussed assistance to achieve the rehabilitation goal.

**Effective vocational rehabilitation** depends on communication and coordination between the key players – particularly the individual, healthcare provider and the workplace.

*G.Waddell*
